NWS Issues Short Term Forecast

The National Weather Service (NWS), Weather Forecast Office Guam, has issued a short term forecast for Guam and Guam coastal waters:

Scattered showers and thunderstorms will bring locally heavy rain up to an inch, and occasional lightning to Guam and the coastal waters west of the island. Drivers should be alert for brief flooding of roads. Boaters will encounter low visibilities of less than a nautical mile. Residents and visitors are advised to seek shelter if lightning is seen or thunder is heard.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind that all care and caution must be exercised by anyone who is traveling in these conditions.
